

Hello - I am writing today as a frequent business traveler and XM radio subscriber.

I cannot express the value of XM (or satellite) radio strongly enough. The ability to receive programming such as local traffic and weather is vital to any driver who finds standard radio coverage of such news to be inadequate.

I respectfully urge the FCC to reject the NAB's petition 04-160, and allow me to choose when I can listen to the services that are most valuable to me.

Thank you for your consideration.
